Nena tie-up boosts Montel-SMHI weather service

Montel and analysis house Nena have signed a strategic co-operation agreement, which will see the inclusion of weather data related to the European energy markets on the existing Montel-SMHI weather service.

New content

- » Forecast **wind** generation indices in MWh/h for the coming 11 days - Germany, France
- » Forecast **solar** generation index in MWh/h for the coming nine days - Germany
- » Forecast **temperature** and **precipitation** energy indices in degrees centigrade and GWh respectively for the coming 10 and 15 days - Austria, Germany, Switzerland, France, Spain, Italy, Portugal and Central Europe

Nena's data complements the primarily Nordic output from Swedish forecaster SMHI. The three companies will continue to jointly develop stand-alone weather products for the European energy trading segment that will become fully integrated into Montel's online service.

The Nena models for Europe along with SMHI's industry knowledge and strong competence within meteorology and hydrology will bring the weather service on Montel Online to a new level.

Subscription fee

All Montel Online customers will have access to the full weather service – including the Nena and SMHI data – for a free trial period of a month. A subscription fee for the 'EU Weather' add-on service is introduced as of 15 September, should you wish to take it up.

Sign up by 15 October for an exclusive introduction offer.

Please contact the Montel sales team on sales@montel.no or +47 22 99 42 00.

For inquiries related to the co-operation, please contact:

Tom Nyblin, CEO Montel, +47 22 99 42 02
Christian Sjødin, CEO Nena, +47 22 31 41 03
